

Open je internet browser en ga naar: www.displaylink.com

Klik vervolgens op "Download Drivers" (rechtsboven)

Klik in het overzicht links in beeld op "Mac"

MENU DOWNLOAD DRIVERS ↓ Search...

DisplayLink Mac OS X Software

From this page you can download a driver for your DisplayLink® enabled USB graphics device that is incorporated in your dock, adapter or monitor. This software provides support for the DisplayLink enabled video outputs. The audio and Ethernet support is provided by native OS X drivers from OS X 10.11.

We would like to make users aware that there are a [number of compatibility issues](#) with macOS Sierra at this time. We do not recommend updating to macOS Sierra until the build stabilizes.

Latest DisplayLink Software Releases

DisplayLink USB Graphics Software for Mac OS X

El Capitan 10.11
Yosemite 10.10
Sierra 10.12

OPTIONAL ADD-ON UTILITIES

DisplayLink have partnered with Actual Tools to bring you a better way to use and manage multiple monitors on Windows!

Actual Multiple Monitors

Het downloaden start nu.

Na het downloaden.

In de map “Downloads” op de MAC zoek het bestand “DisplayLink Installer XXXX.dmg”.

XXXX is versienummer. Dit kan in de tijd anders zijn.

Double click het bestand en installeer de driver.

Herstart de Macbook en de Port Replicator kan aangesloten worden.
